

# details make the room

**Accessories accent, add comfort, help make a mood, and can add surprise.**

PHOTOS, rugs, silk flowers, throws, pillows, lamps, candle holders, mirrors, collectibles, candles, greenery, trays, vases, clocks and more – these are the accessories that are the finishing touches to every good room.

They contribute to mood style and harmony. Reflecting a personal touch, they create a feeling of comfort and completion.

Accessories should accent, not dominate. Scale and balance are important considerations. For example, group small pictures to fill a larger wall space. Accessories also are perfect for creat-

ing seasonal moods or reflecting current trends. Strive for visual unity and harmony. For example, rustic collectibles do not belong in a formal room.

Accessories can add an element of surprise, which is good. A room that is too perfect can look like it came out of a design book. For example a few antiques in a contemporary setting are a welcome visual change. ✨
