

## Let the sun shine in with sunrooms

**Sunrooms** are becoming popular additions to homes in the GTA. They are a great way for homeowners to enjoy their yards regardless of the weather outside.

Unlike solariums, which have glass ceilings as well as windows, sunrooms feature glass walls and opaque ceilings. Optional skylights can be added to the sunroom if the homeowner wishes. Sunrooms are also a more economic choice. A 10-ft by 14-ft sunroom is about half the cost of a comparable solarium.

Lifestyle Sunrooms, located in Ajax, is Canada's largest manufacturer of custom-built sunrooms. The company offers cathedral, studio and unique design rooms that

can be installed on either an existing deck or on an insulated foundation floor. Measurements and permits can be handled by Lifestyle Sunrooms. Installation takes about two to three days.

There are three standard exterior colours to choose from: white, cream or hickory. Regardless of the design or finish colour, all Lifestyle Sunrooms are designed to let in the maximum amount of light. 🌿
