

Get a greener green

Add a practical aspect to your backyard with your own private golf green.

Are you a Golfer? Can you imagine being able to practice your short game on your own realistic putting green in the privacy of your backyard? ProGreen has a unique system that allows you to do that.

Distributed in Canada by Pro-Putt Canada, ProGreen synthetic golf green kits can be installed in as little as one day. ProGreen uses "fibre soft turf technology" filled with Pro-Flex in-fill materials, topped with a rounded ceramic, baked green sand, to cushion shots and give you remarkably realistic play.

ProGreen is designed as a maintenance-free alternative to the expense of real grass. No more watering, mowing or pesticides. The products are virtually indestructible and come with an eight-year limited warranty. ProGreen also is environmentally friendly.

A 180 sq ft (12 ft x 15 ft) green can be installed from \$2,150 plus shipping costs and taxes. Custom green sizes also are available. Several of today's PGA tour professionals practice their putting on ProGreen synthetic greens. Canada's David Morland IV loves the product and practices on one in Orlando, Florida. He also is having one installed at his parent's home in Aurora, Ont.

Since 1987, more than 3,000 ProGreen putting greens have been installed across North America and the world, making ProGreen the leader in the industry.

ProGreen sells and installs fringe turf, sand traps, chipping pads, driving stations, as well as assorted golf products such as ball washers and rakes, to complement your setting.

Other ProGreen products include indoor golf turf as well as the latest "Landscape Turf" for areas where regular grass won't grow. Or maybe you just don't want to start up the lawn mower for a

Synthetic golf greens have been installed in over 100 backyards locally.

small patch of grass. Also, if you are concerned about pesticides and water shortages, Landscape Turf helps solve these environmental concerns.

ProGreen putting greens are a great activity for the entire family and a hit with your neighbours and guests during summer parties and barbecues. 🍁
