

How's Your Hearing?

One in 10 people in Canada has a hearing problem. Over age 50, it's one in five. Ask yourself the following: Are words hard to understand? Are friends and family beginning to mumble? Do you hear better with one ear than the other? Do you find that the volume on TV and radio needs to be higher? Do you find yourself asking others to repeat themselves?

Increasingly, people are focusing on

prevention and early detection, rather than waiting until it's too late. At Chatten's Better Hearing Service, we believe that when you book your other annual check-ups, you need to call us and add hearing to your checklist. There's no charge and you don't need a doctor's referral. 🌟
