

Time to Redesign

The hottest topic in decorating today is interior redesign, a concept that brings a designer look to your home in just one day.

Tamara Welbourn, owner of First Impression Redesign in Burlington, Ont., says anyone can benefit from a redesign.

“Many simply want to spruce up an interior with a new look, others are older couples who have downsized to a retire-

ment residence. There are people with furniture from an old home that isn't working in new surroundings and, of course, others who are blending two families and trying to combine conflicting styles.” ✨
