

10 Warning Signs of Hearing Loss

If you experience the following problems repeatedly and in combination, they may signal a hearing loss.

1. People seem to mumble more frequently.
2. You hear, but have trouble understanding all the words in a conversation.
3. You often ask people to repeat themselves.
4. You find telephone conversation increasingly difficult.
5. Your family complains that you play the TV or radio too loudly.
6. You no longer hear normal household sounds, such as the dripping of a faucet or the ringing of a doorbell.
7. You have trouble hearing when your

back is turned to the speaker.

8. You have been told that you speak too loudly.
9. You experience ringing in your ears.
10. You have difficulty understanding conversation when in a large group or crowd.

If you have these symptoms, speak to a hearing specialist. The advances in technology over the past few years have created virtually invisible hearing instruments that can give you back what you've been missing. 🌟
